<p>EMERGENCY CATEGORIES</p> <p>Category 1 – less than 15 minutes – Immediate life, limb or organ-saving intervention. Resuscitation simultaneous with surgical intervention. Normally within minutes of decision to operate. Patient has immediate life-threatening condition, or is shocked or moribund. Appropriate resuscitation is not providing the expected physiological response.</p> <p>Category 2 – less than 2 hours – Serious condition requiring imminent treatment. Resuscitation simultaneous with surgical treatment. Patient has life, limb or organ threatening condition but is responding to resuscitative measures.</p> <p>Category 3 – less than 6 hours – Operation is not required immediately but must take place as soon as possible Patient is physiologically stable but may undergo significant deterioration if left untreated.</p> <p>Category 4 – less than 24 hours – Operation as soon as possible after resuscitation. Patient is physiologically stable, but some risk of deterioration if left overnight.</p> <p>Category 5 – less than 48 hours – time critical surgery. Patient's condition is stable.</p>	<p>NOTES</p>
